Professional Summary

Frontend developer passionate about crafting visually stunning, responsive, and interactive web applications. Specializes in JavaScript, React, and CSS animations. Solved 500+ coding challenges across platforms like CodeChef, HackerRank, and Codeforces. Currently learning the MERN stack and DevOps practices with real-world application logic and design thinking.

Projects

Modern Portfolio & Resume Builder

Created a vibrant animated developer portfolio and live resume builder using React, Tailwind CSS, and JavaScript.

- Designed glowing UI components with interactive navbar, GSAP-based animations, and 3D effects.
- Built dynamic form-based resume builder with real-time preview and export feature.

Wordle Clone & Currency Converter

Implemented mini-projects using React, JS, and REST APIs for hands-on frontend development practice.

- Developed Wordle with custom keyboard, React state logic, and win-check feedback.
- Built live currency converter using exchange rate API with responsive design.

Education

B.Tech in Computer Science, PW Institute of Innovation 2024 – 2028
Focused on web development, DSA, and real-world tech projects.

High School Diploma, Nehru Balodyan School 2022 – 2023
Specialized in Computer Science and Mathematics.

Technical Skills

JavaScript (ES6+)
Tailwind CSS
Responsive Design
Git/GitHub

React.js
GSAP
Web Accessibility
VS Code

HTML5/CSS3
TypeScript
REST APIs
Figma

Certifications

- JavaScript Algorithms and Data Structures — PW Institute of Innovation (2025)
- Advanced React and Redux — Udemy (2025)
- Responsive Web Design — ChaiAurCode (2025)
